

Corals to Classrooms:
A Workshop Celebrating International Year of the Reef 2008!
Sponsored by Texas Marine Education Association
Hosted by Flower Garden Banks National Marine Sanctuary

What are corals? How do they build reefs? Why are the coral reefs of the northwestern Gulf of Mexico so special and unique? What does all this have to do with the NOAA National Marine Sanctuary Program? Join the Flower Garden Banks National Marine Sanctuary and the Texas Marine Education Association as we celebrate International Year of the Reef in 2008! Learn about the stunning coral reefs in Texas and Louisiana's back yard from April 25-27, 2008. Tour a turtle hatchery where NOAA raises loggerhead sea turtles, the same species that is most abundant at the sanctuary's coral reefs. Try out six different classroom activities, ranging from lower elementary to high school. Pick up cool video footage of the sanctuary and additional activities to try at home. Have a rollickin' good time at the annual TMEA fundraiser auction on Saturday evening. Finish the weekend with a fun and informative Jetty Crawl along the Galveston seawall. Remember to bring your collecting gear if you want to bring stuff home from the jetties to your classroom aquarium.

Participants will receive **10 hours continuing education credit** from the TX State Board of Educator Certification (SBEC), applicable toward maintaining teaching certification in Texas.

Friday evening - April 25, 2007: Optional social gathering. Location to be determined.

Saturday - April 26, 2007

8:30 - 10:45 am

Intro to FGBNMS and coral reefs (with focus on International Year of the Reef)
